PROFILE

Data science student who enjoys turning ambiguous, high-volume problems into working systems. Builds across research tooling, retrieval, distributed infrastructure, and applied AI; leads with curiosity, candour, and a strong bias toward people.

SELECTED BUILDS

Stretchy · solo · active

Local-first, evidence-grounded investigation system spanning durable workflows, retrieval, a bounded evidence graph, worker telemetry, and a Rust scanning path. Python, Rust, Temporal, PostgreSQL, Qdrant, FalkorDB.

Arachne → PhishGuard · solo · research experiment

Built a high-concurrency Rust crawler to collect DOM structure from phishing and legitimate sites, then trained a hybrid graph model using DOM topology and URL features. Held-out phishing metrics: 0.99 recall, 0.94 precision; documented the dataset-distribution limitation that restricts real-world generalization.

UltraChat · GDG VIT · collaborative

Discord knowledge companion for large server histories. Contributed retrieval, vector storage, long-text summarisation, prompt flows, commands, Docker setup, and backend integration. Python, LlamaIndex, LangChain, ChromaDB, Discord API.

Kargo · GDG VIT · collaborative

Contributed to the repository-inspection path for an AI-assisted deployment platform, including codebase summarisation and extraction of port and persistence signals used during container configuration generation.

LEADERSHIP AND COMMUNITY

- Senior Core Member, GDG VIT — leads the AI/ML domain in practice; helps plan and run DevJams, Women Techies, and Hexathon across operations, technical work, and judging.
- Helped evaluate a recruitment pool of about 5,000 applicants and personally assessed roughly 256 through tests, projects, and interviews.
- Sole speaker and curriculum designer for Inside Google's DeepMind, a 400+ student session covering transformers and AlphaFold.

EDUCATION

B.Tech, Computer Science
Specialization in Data Science
VIT Vellore
Expected 2027

TOOLKIT

LANGUAGES	Python · Rust · TypeScript · Go
SYSTEMS	FastAPI · Temporal · Docker · PostgreSQL
RETRIEVAL	Qdrant · FalkorDB · ChromaDB · LlamaIndex
ML	PyTorch · PyTorch Geometric · Transformers · GNNs
WORKING STYLE	Research · technical writing · leadership · rapid iteration

EARLIER CHAPTER

Built a private Discord bot in Grade 11 while learning Python through experimentation. Friends used its music, games, moderation, and class-reminder tools through remote school.

Served as Head Boy in Riyadh, focused on trust, cooperation, and representing students responsibly.
